Sitecore MVP 2013
Sitecore Technology MVP 2014

Certifications

SUMMARY

I'm a self going developer with more than 16 years of experience. I've been working with everything from front-end web development to backend servicebus solutions integrated to ERP and other business systems. A lot of focus during my career has been towards the Sitecore CMS platform and I became a Certified Sitecore Developer already at 2008 and was awarded the Sitecore Technology MVP award at 2013 and 2014. In later years I've also been working alot with Sitecore Commerce. With many years of experience as a Solutions architect I've got an eye for system strategy and make systems cooperate with each other.

WORK EXPERIENCE

Radinn AB   2019 - 2023

Solution Architect / Developer

Building E-commerce solution using Sitecore and Sitecore Commerce integrated with Moduslink 3PL provider, ScanGlobal logistics partner and Skybridge to offer Radinn surf boards world wide. Here I worked with Microsoft Azure, Azure DevOps for CI/CD, Google Cloud Platform mainly PubSub and lots of other technologies.

Consid   2019

Solution Architect

Helping Consid AB with a Code Review on Nederman Sitecore Solution. The Code Review covered everything from setup in the Sitecore solution, reviewing the source code for improvements to how the SEO was set up.

Anima AB/Kronaby - Malmö   2016 - 2019

Solution Architect / Developer

Helping Anima to pull the development of their e-commerce platform inhouse from external partner.

As the main developer and architect I along with a team of 3-4 developers helped Anima launch their Kronaby brand to most of the corners of the world. Based on Sitecore Commerce we built a e-commerce solution hosted in Azure using many of the tools within the Microsoft Azure eco system such as Azure CDN, Azure SQL and Cosmos DB.

Thule - Malmö   2016

Developer

Creating and optimising SOLR indexes for faster handling and searching for products on a partner Extranet. This involved setting up SOLR Cloud and configuring indexes to handle multiple languages and free text search.

Solid Försäkringar - Helsingborg   2015 - 2016

Developer

Got introduced to, and later took over, the development of Solid Försäkrings new ServiceBus system to handle insurance calculations, quotations and activations. The ServiceBus system was based on NServiceBus with MSMQ queue system in the bottom. This ServiceBus system helped relay, validate and create insurances in the business system based in IBM iSeries.

Also introduced automatic deployments of these services using TeamCity and PowerShell scripts.

During my time at Solid Försärkingar I also did several optimisations by changing the Dependency Injection framework.

Hogia - Stenungsund   2014 - 2015

Developer

Developed an Android and iOS app based on Xamarin platform. Purpose of app was to help Hogia partners send work assignments to their personel with material specification and instructions. Based on the material and instructions in the work assignment, the personel could easily make a cost report with the material in the assignment, additional materials used and time spent on the assignment.

Consafe Logistics - Lund   2014

Developer

Built new web solution for Consafe Logistics to help promote their offer. Solution was built on Sitecore CMS.

Boxon   2012

Solution Architect

Sitecore 9
Sitecore 8
Sitecore 5

Solution Architect and SCRUM Master for developing four multilingual sites in Sitecore with responsive design for Boxon (Boxon Pak, Boxon Mark and Boxon Bulk)

HSB Nordvästa Skåne   2012

Solution Architect / Developer

Solution Architect and lead developer for providing HSB Nordvästra Skåne with a cool website with responsive design.

Bostik - Helsingborg   2011

Solution Architect / Developer

Solution Architect and lead developer for a multilingual website based on Sitecore with product synchronisation from an AS/400 system and integration of an external media library.

Built parts of the backend against Sitecore in .NET and a lot of the frontend HTML, CSS and Javascript.

SKILLS

Azure / GCP / Clouds

I've been working with Microsoft Azure for several years and Google Cloud Platform GCP for a few years

HTML / CSS

Have been working several years with building web sites and have during this time accumulated a lot of knowledge in both building efficient HTML and CSS but also SEO optimised.

Javascript / Typescript

Javascript goes hand in hand with HTML, CSS and APIs when creating dynamic websites. In later days I've been using Typescript over Javascript for the stronger typing which Javascript lacked, but has since been introduced in ES6.

C# .NET Framework / .NET Core / .NET Standard

Have been working with .NET C# my entire career and built many solution with it.

SQL and SQL Profiling

SQL is usually used in most .NET projects. Due to the nature of SQL it is sometimes hard to find performance problems, thus I've spent a lot of time with SQL Profiling when troubleshooting.

Build automation / Continuous Integration

Have been working a lot with automating testing and deployment procedures both in TeamCity, Jenkins and Azure DevOps.

EDUCATION

Lunds Teckniska Högskola   2004 - 2007

Bachelor of Science, Data Science

Sweden

Tycho Brahe senior high school   2000 - 2003

Natural Science Program with web and programming

Sweden
